Executive Summary

Student data for the period 1996-97 to 2001-02 is available for all programs offered at SIAST. The data, recorded by Banner, is extracted from the record system, analyzed and used in a variety of reports prepared for SIAST senior management. Data in each year are based on an academic year for the period July - June and are head count figures, not cohort data. For instance, applications in one academic year may not be the same students as the enrollment figures identified in the same academic year. The analyses of data provide supporting documentation in the strategic planning processes for SIAST programs.

The summary report of the data is produced annually. In the past, a five-year history was recorded and the report became known as the *Five-Year Summary of SIAST Programs*. With the inclusion of the 2001-02 data, the report will be a six-year history.

The *Six-Year Summary of SIAST Programs 1996-97 to 2001-02* report is a comprehensive picture of students in SIAST programs and includes data by head count for applications, enrollment and graduates.

The report also identifies capacity figures for SIAST programs. Capacities are determined by full-load equivalent (FLE), which were approved by the SIAST board of directors and presented to Saskatchewan Learning in December 2001. The capacities use the following formulae:

- **Full-time** - credit, non-credit, apprenticeship and partnership capacity seats -assessed at one full load equivalent per one head count
- **Part-time credit** - capacities determined by eight course registrations per one full load equivalent
- **Part-time non-credit** - capacities determined by fifteen course registrations per one full load equivalent

The attached reports includes data for:

- **Core funded programs** -
  - applied certificate, certificate, advanced certificate and diploma
  - full-time and part-time
- **Non-core funded programs** -
  - applied certificate, certificate, advanced certificate and diploma. These include those offered in partnership with the regional colleges or other agencies; distance delivery; SCN; and online
  - full-time and part-time
- **Apprenticeship programs**
- **Basic education programs**
  - The basic education program data are totalled separately from the certificate/diploma programs at SIAST (page 29). The figures for FLE in 2001-02 were re-calculated based on a formula determined by the dean of basic education and the Institutional Research and Analysis office. The calculation process is an interim step and discussions are ongoing to define an appropriate measure for calculating basic education FLEs.

The 2001-02 data is color coded/shaded to differentiate certificate/diploma programs from apprenticeship programs. The report has two sections: a breakdown of the data per program (pages 3 – 28); and a division roll-up, sub-divided for current certificate/diploma offerings, current apprenticeship offerings, deleted programs, overall total of all programs, core and non-core programs (pages 1 and 2).

Programming continues to be updated at SIAST with the introduction of new programs and the deletion of others. The data for each division have been divided in two:

- current program offerings listing all programs offered in 2001-02; and
- deleted programs which records programs that have been deleted over the past six years.

A number of the recently deleted programs will continue to have data until students graduate. Those with little or no data have remained in the deleted sections. A number of other programs with a variety of data (enrolments or graduates) are located in the current programs section.

[1] Capacity 01-02 includes figures for on-campus certificate/diploma, basic education and apprenticeship programs. Capacities are based on full-load equivalent figures. Because of the variety of formulas used for part-time, on-line, work-based, SCN, distance education and future skills offerings, FLE capacities are not included for any extension programs. Therefore the capacities total will not match the approved SIAST capacities

[2] Applications - Apprenticeship, basic education and extension figures not included. These figures are not managed by SIAST

[3] Enrolled - includes all activity at SIAST

[4] Graduates 01-02 includes all activity at SIAST. Data in 2001-02 is taken from the graduate employment survey which includes graduate activity up to October 2002 rather than July 2002. The shaded rows indicate the year one of diploma programs where there are no graduates. There were 14 additional graduates (from the 2000-01 Medical Laboratory Technology program that were not surveyed last year

[5] Non-core funded programs are those not totally supported by the SIAST budget

[1] Capacity 01-02 includes figures for on-campus certificate/diploma, basic education and apprenticeship programs. Capacities are based on full-load equivalent figures. Because of the variety of formulas used for part-time, on-line, work-based, SCN, distance education and future skills offerings, FLE capacities are not included for any extension programs. Therefore the capacities total will not match the approved SIAST capacities

[2] Applications - Apprenticeship, basic education and extension figures not included. These figures are not managed by SIAST

[3] Enrolled - includes all activity at SIAST

[4] Graduates 01-02 includes all activity at SIAST. Data in 2001-02 is taken from the graduate employment survey which includes graduate activity up to October 2002 rather than July 2002. The shaded rows indicate the year one of diploma programs where there are no graduates. There were 14 additional graduates (from the 2000-01 Medical Laboratory Technology program that were not surveyed last year
